Perityphlitis [**Appendicitis**].

[Since the publication, in 1896, of Volume I of the present series of the Index-Catalogue the writings relating to appendicitis have so accumulated that it has been thought convenient to print them in connection with perityphlitis rather than wait for the appearance of the third series. A large part of the articles under the latter heading describe cases of appendicitis, and both terms are still indiscriminately used in relation to inflammation of the appendix. For like reason the subject typhlitis has also been included.]
